

TINTERN GRAMMAR ENRICHMENT PROGRAM

The Enrichment program is offered to those students who would benefit from additional intellectual, creative or artistic enrichment.

Identified students in Years 6 and 7 will be able to select one of three enrichment/extension units which will be offered in Term 2. There will be a further three units offered again in Term 3. Each unit will run for 5-6 lessons over the term, at a time nominated by the teacher.

The units are broad and rich in content. Information covered will be intellectually suitable for our brightest students who will benefit

from this additional, rigorous material. Examples of units which have been offered previously include:

Introduction to AUSLAN

In this unit students learned about AUSLAN - Australian Sign Language.

Create a POD

Podcasts are the fastest growing way for everyday people to share their ideas, stories and research. Through participation in 'create a pod' students learned the steps to creating an engaging podcast.

Are They Related?

Students used mathematics to determine if there is a connection between two different variables, then develop an equation to make predictions for future values.

Big Ideas

Students used high-order thinking to formulate provocative, ambiguous and thought-provoking discussion, with the outcome being determined by students.

Philosophy: Design the Perfect Society

Students explored some big questions then used new-found knowledge to construct a blueprint for our perception of a more perfect society.

If you have any questions regarding the Enrichment Program please contact Anthea Watkins, Horizon Coordinator on 03 9845 7839
